

Airdrive 7.2 has officially launched !

All current devices that were operational on AirDrive 7.1 (old AirDrive platform) will continue to enjoy the free service until the 1st November 2016.

There after ALL GSM Commanders will have to be moved to AirDrive 7.2 as our previous version will be discontinued.

ALL new devices added to AirDrive 7.2 (new platform) will now be billed according to the AirDrive subscription you have chosen.

Airdrive Subscriptions

We currently have 3 Airdrive Subscriptions, the **Editor, Historian & Viewer** Each Device receives a Complimentary 1 months worth of FREE Credits when added to the system.

Model Dependency: * Features are Model Dependant for only GC0641 and GC1281 GSM Commander Models.

TAKE NOTE : *Features are Model Dependant for only GC0641 & GC1281 GSM Commanders

Credits & Payments explained

Each plan consumes the relevant credits per month depending on which subscription your device has been loaded with.

If you have a Standard GSM Commander loaded on the Editor package then your device will consume 100 credits every month.

Credits are typically purchased once a year for each device.

So in the above mentioned example, the Standard GSM Commander on the Editor package, you will purchase the full 12 months worth of credits yearly (1200 credit).

In order to find out the cost per credit please contact your GSM Commander Agent / Installer.

New Features & Benefits

Entities Management

Our New Entities Management System enables you to manage your Agents, Customers and Sites in a **treelike interface**.

Devices are now structured to belong to an site, A site belongs to an Customer etc.

User Role Permissions

Our New User Role Permissions allows you to assign user roles to a user, this either giving them an **admin** role or a standard **user** role.

Also assigning an User to an Entity, will give them access to only that entity and below.

User Management

Users with the **Admin Role** can manage users, thus adding, editing a user.

Also assigning of users to an parent entity will only give them access to that entity and below.

Events Management

Events/Messages Generated by Devices are populated in the Events View.

A New option to **Update an Event** with an Description is now available, The **User** and the **Date and Time** are also stored.

When the event is fully acknowledged you can **Finalise** the event.

User Interface

An new Updated User Interface have been implemented.

Minimalistic Navigation

To Maximise the available screen area the navigation are now simple hover icons.

Sub Navigation Options Bar

This Options bar are visible on each page with a Entity Scope and Field Filtering Options.

Website Tours

A New **Feature** have been implemented to help **users** with the new **User Interface** and **Features**.

When you visit a page you will be taken though a **simple tour** of the **features** of the page.

This will be shown **each time** until you click *"do not show again"* for that page.
